

## SureReg™ - 1/2" & 1" Inline 30, 40 and 50 psi Regulators

### Applications:

GPH SureReg™ pressure regulators maintain a constant outlet pressure even with varying inlet pressures. What makes the SureReg™ stand apart is our proprietary pressure sensing technology that eliminates full inlet line pressure from damaging downstream components which has historically been a massive issue in commercial landscape applications. It looks different because it is different.

### Features:

- Reliable Performance** - eliminates pressure spikes not caught by external sensing pressure regulators
- Variety** - offered in 30,40 and 50 psi regulator
- Flexibility** - can be installed anywhere on the irrigation system to reduce pressure, above grade or below grade.
- Ease of Installation** - SureReg™: pipe thread (FIPT x MIPT)
